

Risks	Condition	Consequence	Impact	Probability	Time Frame	Risk Exposure	Mitigation Strat
	Hardware Change (Scanner)	Frontend Client Rearchitect	High	Very Low	Anytime	Low-Medium	Rearchitect frontend
	Team conflicts	Uneven work distribution	Medium	Medium	Anytime	Medium	Work redistribution
	Testing conflicts (not having blind users to test our software)	Poor results for testing	Medium	High	Last sprint	Medium-High	Ask client for assistance in testing
	Client is not involved enough in the developement process	We develop a product that the client does not like	Medium	Low	Anytime	Low-Medium	Keep client up-to-date
	Client does not approve of project direction	We have to replan the product	High	Low	Anytime	Medium	Keep client up-to-date with weekly email reports
	Client does not approve of how we implemented certain parts of the application - such as dealing with items that are not in the UPC database						
		We have to replan that feature	Medium	Low	Anytime	Low	Demos at the end of the sprint
	Unable to get good (new/large) UPC database	More hits on handler for items not in db	Low	Medium	First sprint	Low-Medium	Make a robust method of handling items not in DB
