

Project and Sprint 1 Plan

Team: Three Blind Mice

Members: Andrew Chang (afchang@andrew),
Tanay Gavankar (tgavanka@andrew),
Steven Kang (sskang@andrew)

Client: Michael Bigrigg (bigrigg@cs)

Weekly Meetings:

No in-person meetings were scheduled. However, we agreed to send weekly emails detailing our current progress and status.

Picture of Success:

The team developed the software suite on time and the suite improves the lives of the visually handicapped. The software will have core functionalities: inventory tracking, inventory scanning to add and remove items, multi-user (blind users and aide users) support, and shopping list generation. The team plans to exceed the client expectations and implement request features beyond core functionalities.

Sprint 1 Roles:

Scrum Master:

Andrew Chang

Product Owner:

Tanay Gavankar

Developer:

Steven Kang

Sprint 1 Goals:

Have a working prototype which includes core functionality. Core functionality includes: Being able to scan items in and out of your inventory, being able to register and login to the application and being able to view your inventory.

Product Backlog:

See attached for full backlog. Cost estimations were determined via planning poker. Risk was defined to be the impact of not completing the feature. Client value was defined to be how much importance the client gave to a specific feature.

Risks:

See attached.
